AND Recipe App - Recipio

Description

Recipio is an app for creating and managing recipes. Users can create their own recipes from scratch or get them from a public recipe library. Every user has their own cookbook which acts their personalised recipe library.

I chose to do this app because I love to cook and I want to make the experience of finding and creating recipes more accessible to beginner cooks.

Requirements

Green = Completed
Red = Incomplete

Critical

1. As a user, I want to be able to add, edit and remove recipes, such that I can better manage my recipe library.
2. As a user, I want to be able to register and login to my own account so I can have private access to my recipe library.
3. As a user, I want to be able to create my own recipe, such that I can make a custom library of recipes.

High

4. As a user, I want to be able to search for recipes, such that I can discover new recipes.
5. As a user, I want to be able to favourite a recipe, such that I can keep track of my preferred recipes.
6. As a user, I want recipe profiles to contain nutritional information, such that I have better insight into how healthy they are.

Low

7. As a user, I want to be able to share recipes with other users, such that I can exchange recipes more easily.

8. As a user, I want to be able to be able to categorize the recipes in my recipe library such that I can better organize them.
